

Miniature Electromagnetic Relay 3A

This miniature electromagnetic relay has a 3A switching capacity at 120VAC and 24VDC. It is designed for PCB mounting and features a compact design.

Overview

Compact Power Switching Solution

This miniature electromagnetic relay is designed for efficient power control in space-constrained environments. Engineered for PCB mounting, it delivers reliable performance for both AC and DC switching tasks. Its compact footprint makes it an ideal component for a wide variety of industrial and consumer electronic applications requiring precise signal management.

Performance

Switching Capacity

3 A

Rated Current

120 VAC

AC Voltage Capacity

24 VDC

DC Voltage Capacity

Mounting Style

PCB Mount

Certifications

Compliance

RoHS Compliant, Miniature Design
