

Miniature LED Bulb

This miniature LED bulb features a compact design, energy efficiency, and long lifespan. It is suitable for various indicator and illumination applications.

Overview

Compact Illumination Solution

This miniature LED bulb is engineered for versatility and reliability in various indicator and illumination applications. Featuring a clear lens and a distinct red base, its compact design ensures it fits seamlessly into tight spaces while offering high energy efficiency. The unit operates on low voltage and provides a bright, focused light output, making it an ideal choice for professional-grade signaling and lighting needs.

Technical Specifications

Light Source	LED
Voltage	Low Voltage
Design Features	Compact Design, Clear Lens, Red Base, Wire Leads

Performance

Key Benefits

- Energy Efficient
- Long Lifespan
- Bright, Focused Light Output
- Easy Installation
