

Mining Bucket Lip Shroud Protector

This lip shroud protector offers high wear resistance for increased production efficiency. It features durable construction with high fatigue resistance and reliability.

Product Overview

Mining Bucket Lip Shroud Protector

These heavy-duty, cast metal lip shroud protectors are engineered to withstand the most demanding mining environments. Designed to protect the leading edge of mining buckets from severe wear and impact, they help maintain structural integrity and enhance overall bucket performance. Their robust construction and precise fitment are optimized for excavators, loaders, and bulldozer rippers, effectively reducing maintenance downtime

Product Features

Design Features

Heavy-duty cast metal • Corrosion resistant finish • Integrated lifting points • Impact resistant

Equipment Applications

Excavators, Backhoe, Front Shovel, Electric Shovel, Loaders, Bulldozers, Motor Grader
Rippers
