

Mining Drainage Pump

This mining pump is designed for safe and reliable operation in demanding environments. It is suitable for water drainage and supply in industries such as coal, metallurgy, and urban construction.

Product Overview

Industrial-Grade Drainage Solution

This mining drainage pump is a robust, high-performance unit engineered for heavy-duty water supply and drainage applications. It is specifically designed to meet the rigorous demands of coal, metallurgy, and power generation industries. With its advanced hydraulic configuration, the system delivers exceptional efficiency while maintaining reliability in challenging urban construction and groundwater development environments.

Performance Metrics

Operational Capabilities

1450 m³/h
Max Discharge

1000 m
Max Head

2400 kW
Max Power

Power Rating Range

55 - 2400 kW

Electrical Specifications

Available Voltages

- 380V
- 660V
- 3kV
- 6kV

Certifications & Standards

Quality Compliance

ISO 9001, CE Certified

Application Areas

Suitable Industries

Coal Mining • Metallurgy • Power Generation • Urban Construction • Groundwater Development
