

Mining Slurry Pump

This heavy-duty slurry pump is designed for demanding mining applications. It efficiently handles abrasive and corrosive slurries, ensuring reliable performance and extended service life.

Product Overview

Heavy-Duty Slurry Pumping Solution

This cantilevered, horizontal centrifugal slurry pump is engineered for demanding industrial environments. Designed to handle highly abrasive and high-concentration slurries, it ensures reliable performance in harsh operating conditions. The unit supports multi-stage series installation, making it a versatile choice for complex material transfer requirements.

Technical Specifications

Design Type	Cantilevered, horizontal centrifugal
Installation Capability	Multi-stage series

Certifications

Compliance & Standards	CE, ISO, UKAS, SGS
------------------------	--------------------

Applications

Suitable Industries

- Metallurgy
- Mining
- Coal
- Power Generation

Material Handling

Abrasive Slurries • High Concentration Slurries • Mineral Concentrates • Tailings
