

Mixed Copper Plumbing Scrap

Assorted copper pipes, fittings, and valves are available for recycling. The mixed collection shows oxidation and wear, suitable for scrap or potential reuse.

Product Overview

Heavy Copper Plumbing Scrap

This product consists of high-quality mixed copper plumbing scrap, categorized as heavy copper. The assortment includes a variety of salvaged copper pipes, fittings, and brass valves, making it ideal for recycling operations or industrial salvage projects. The material exhibits characteristics consistent with reclaimed plumbing components, offering a reliable source of copper for metal recovery processes.
