

Mixed Flow Pump for Industrial Applications

This mixed flow pump combines centrifugal and axial flow characteristics for high flow rates at moderate heads. Its durable construction and efficient motor make it suitable for water supply, irrigation, and industrial fluid transfer.

技术参数

型号	最大流量 m ³ /h	扬程 h	功率 Kw	转速 r/min
RT200-8Z	460	8	11	1450
RT250-15Z	720	15	22	1450
RT300-8Z	910	8	22	970
RT300-10Z	800	10	22	970
RT300-11Z	910	11	30	970
RT350-8Z	1220	8	30	970

Product Overview

Robust Mixed Flow Pumping Solution

This mixed flow pump is engineered to bridge the gap between centrifugal and axial flow pumps, delivering high flow rates at moderate heads. Designed for reliability, the unit features a durable cast iron casing and impeller to withstand demanding industrial environments. It is powered by a high-efficiency electric motor, making it an ideal choice for water supply, irrigation, drainage, and large-scale industrial fluid transfer.

Application Details

Primary Applications

Water Supply, Drip Irrigation, Industrial Drainage, Fluid Transfer

Technical Specifications

Performance Models

Model	Flow Rate (m ³ /h)	Head (m)	Power (kW)	Speed (r/min)
RT200-8Z	460	8	11	1450
RT250-15Z	720	15	22	1450
RT300-8Z	910	8	22	970
RT300-10Z	800	10	22	970
RT300-11Z	910	11	30	970
RT350-8Z	1220	8	30	970
