

Mixed Metal Scrap Heap

This is a collection of assorted metal scrap parts. The components show signs of wear, corrosion, and breakage, suggesting a recycling or salvage operation.

Product Overview

Mixed Metal Scrap Overview

This product consists of a disorganized collection of metallic scrap parts, sourced from disassembled machinery and vehicle components. The material includes a varied composition of both ferrous and non-ferrous metals, suitable for recycling or salvage operations. Please note that the items exhibit signs of wear, corrosion, and breakage, reflecting their recovered nature.
