

MMA-400S/500S Manual Metal Arc Welding Machine

The MMA-400S/500S is a robust welding machine designed for MMA (Manual Metal Arc) welding processes. Engineered for durability and efficiency, this unit is suitable for professional and industrial use, featuring adjustable current settings and thermal overload protection.

Product Overview

Professional MMA Welding Solution

The MMA-400S/500S is a robust welding machine engineered specifically for Manual Metal Arc (MMA) welding processes. Designed for both professional and industrial applications, this unit delivers reliable performance with precise control capabilities. Its durable construction, combined with features like thermal overload protection and adjustable current settings, ensures stable arc characteristics and high-quality welds across various material types and thicknesses.
