

# MMA Welding Machine

This is a compact and portable welding machine designed for MMA welding processes. It features adjustable amperage and thermal overload protection and is suitable for light to medium-duty welding applications.

## ADDITIONAL IMAGES

## Product Overview

### Compact MMA Welding Solution

This compact and portable welding machine is engineered specifically for MMA welding processes. It features adjustable amperage controls and integrated thermal overload protection to ensure safety and reliability during operation. Designed for versatility, it is compatible with various electrode types, making it an excellent choice for light to medium-duty welding applications including maintenance, repair, and fabrication tasks.

## Technical Specifications

### Safety Features

Thermal Overload Protection • Adjustable Amperage

### Available Models

160M, 200M, 250M

### Process Type

MMA (Manual Metal Arc)

## Applications

### Primary Applications

- Maintenance
- Repair
- Fabrication
