

# Mobile Air Compressor Unit

This mobile air compressor unit is engineered for industrial use. It features a rugged build and a trailer configuration for mobility.

## Overview

### Industrial Mobile Air Compression

The HG375D-8 is a robust, mobile air compressor unit engineered specifically for demanding industrial environments. Designed for maximum portability, it features a single-axle trailer configuration that allows for easy transport between job sites. The unit is built with a protective enclosure and integrated ventilation louvers to ensure reliable performance and cooling during operation.

## Technical Specifications

Model	HG375D-8
Design Features	Mobile, Single-axle, Trailer-mounted, Protective Enclosure

## Operational Details

### Mobility & Setup

- Integrated tow hitch for vehicle attachment
- Single-axle trailer configuration
- Support stand for stable operation
