

Mobile Air Conditioning Unit with Self-Evaporation

This portable air conditioning unit offers spot cooling for diverse environments. Its compact design includes casters for mobility, an exhaust hose, user-friendly controls, a self-evaporative system, and a washable air filter.

Product Overview

High-Efficiency Portable Cooling Solution

This mobile air conditioning unit is engineered for versatile spot cooling in professional and residential environments, including offices, workshops, and homes. Designed with mobility in mind, it features integrated casters for easy relocation and a self-evaporative system that significantly reduces maintenance by minimizing manual drainage requirements. The unit includes a user-friendly control interface for precise temperature and fan speed adjustments, ensuring optimal comfort and efficient operation.

Key Features

Cooling Capabilities

Self-Evaporative System, Spot Cooling, Adjustable Fan Speed, Temperature Control

Design & Maintenance

Maintenance

- Washable air filter for clean operation
- Self-evaporative condensate management
- Integrated casters for mobility

Design Elements

Portable • Compact • User-Friendly Controls

Technical Specifications

Installation Requirements

Includes exhaust hose for external hot air venting
