

# Mobile Air Conditioning Unit

This portable air conditioner is designed for convenient cooling in various indoor environments. Its compact design allows for easy movement and storage.

## ADDITIONAL IMAGES

## Product Overview

### Next-Generation Cooling Solution

This self-evaporative mobile air conditioning unit represents a new generation of climate control technology. Designed with efficiency in mind, the system reuses internal water generation to eliminate the need for manual drainage, while its compact footprint optimizes logistics and storage. It offers a user-friendly experience with silent operation modes and smart features like self-diagnosis and programmable timers.

## Key Features

### Core Functionalities

- Self-evaporative system
- Silent operation mode
- Self-diagnosis function
- 24-hour timer
- Easy-install exhaust hose

### Mobility & Design

Compact Design, Four-way Casters, Portable, Easy to Move

## Performance Metrics

### Noise Level

Low Noise • Silent Function

### Performance Highlights

**24 hours**

Timer Function
