

Mobile Chemical Processing Unit Model

This is a detailed scale model of a mobile chemical processing unit. The model showcases a truck pulling a trailer with accessible compartments and intricate internal components.

Product Overview

Mobile Chemical Processing Unit Model

This detailed scale model represents a mobile chemical processing unit designed for industrial applications. The unit features a truck cab configuration towing a specialized trailer equipped with multiple processing compartments. With accessible internal components, tanks, and realistic machinery, this model provides a comprehensive visual reference for chemical transport and processing logistics.

Design Features

Internal Components

- Processing tanks
- Internal machinery
- Detailed chassis

Unit Configuration

Truck and Trailer

Accessibility

Opening doors, Access stairs, Multi-compartment design

Safety and Compliance

Safety Features

Yes
