

Mobile Circular Industrial Heater

This mobile circular industrial heater provides targeted heat in large spaces. It features a durable metal housing, safety grill, adjustable heat settings, and easy mobility for reliable performance.

Product Overview

Robust Circular Industrial Heating

The IFH04-180 is a high-performance circular industrial heater engineered for demanding environments such as workshops, warehouses, and construction sites. Its design prioritizes both durability and portability, featuring a rugged metal housing and a stable, wheeled frame for easy repositioning. With intuitive top-mounted controls, this unit provides reliable and targeted heat management for large professional spaces.
