Product Overview

Integrated Mobile Concrete Solution

The YHZS series mobile concrete batching plant is a highly integrated and efficient production solution designed for maximum flexibility. By combining material storage, weighing, conveying, mixing, and control systems into a single mobile chassis, it significantly reduces installation time and costs. This unit is ideal for construction projects requiring frequent site changes or operating in limited space, providing consistent concrete quality on demand.

Technical Features

Key Capabilities

- Integrated material storage and weighing
- Automated control system for precise batching
- Twin-shaft mixer for consistent quality
- Modular design for rapid deployment
- Highly mobile chassis for easy relocation

Performance Metrics

Performance Highlights

60 m³/h

Model Capacity

Applications

Suitable Projects

Road Construction, Bridge Building, Infrastructure Development, Temporary Site Projects
