

# Mobile Concrete Batching Plant, 35 m3/h

This mobile concrete batching plant provides a compact solution for producing concrete on-site. With a capacity of 35 cubic meters per hour, it balances productivity and portability for small to medium-sized construction, road, and bridge projects.

## Overview

### Compact On-Site Efficiency

The YHZS35 mobile concrete batching plant provides a high-efficiency solution for on-site concrete production with a capacity of 35 cubic meters per hour. Designed for rapid deployment, its mobile chassis integrates a twin-shaft mixer, precise aggregate batching, and automated weighing systems for cement, water, and additives. This plant is engineered to support small to medium-sized construction projects, including infrastructure developments like roads and bridges, where mobility and quick setup are essential.

## Performance

### Theoretical Productivity

**35 m3/h**

Theoretical Productivity

## Weighing Accuracy

### System Weighing Capacities

Component	Capacity
Concrete	2500
Cement	600
Water	250
Liquid Addictive	25

## Technical Details

### Power Requirements

- Overall power: about 60 KW
- Power source: 380V / 50HZ

## Mobility and Dimensions

Operating Dimensions (LxWxH)	17 x 3.6 x 8.2 meters
Transport Dimensions (LxWxH)	18 x 2.4 x 4.35 meters
Max Trail Speed	40 km/h
Discharging Height	3.8 M
