

Mobile Concrete Batching Plant

This mobile concrete batching plant provides a versatile and efficient solution for on-site concrete production. Its modular design allows for easy transportation and setup, incorporating aggregate batching, weighing, and mixing capabilities.

Product Overview

High-Efficiency Mobile Concrete Production

The HZS series mobile concrete batching plant provides a versatile, modular solution for on-site concrete production, ideal for projects requiring frequent relocation or limited space. This system integrates aggregate batching, weighing, and mixing capabilities into a compact, mobile chassis to reduce transportation costs and ensure timely supply. Engineered for reliability, it features a twin-shaft mixer and a computerized control system that guarantees precise material proportions and consistent, high-quality concrete output.

Certifications & Awards

National Science and Technology Commission Appraisal, Advanced Domestic Level, Advanced World Level Productivity, 2005 New Key Product of China

System Features

Integrated Components

- Aggregate batching system
- Precise weighing system
- Twin-shaft mixer
- Computerized control panel
- Mobile chassis

Operational Advantages

Modular Design • Easy Transportation • Automated Operation • Noise Control • Environmental Production
