

Mobile Concrete Crusher

The mobile concrete crusher incorporates all equipment on a single truck for easy transport. It is capable of on-site crushing without the need to move materials from one location to another.

Product Overview

A robust mobile concrete crusher mounted on a heavy-duty trailer, featuring a large hopper and discharge conveyor for efficient on-site material processing.

Mobile Concrete Crusher Solution

This mobile concrete crusher integrates all essential crushing and screening equipment onto a single, high-chassis truck. Designed for maximum efficiency, it allows for on-site crushing without the need for transporting materials, significantly saving time and operational costs. The unit is ready for immediate operation even on uneven ground, eliminating the need for complex reinstallation.

Key Features

Integrated Components

- High-performance jaw, impact, and cone crushers
- Integrated feeder, belt conveyor, and vibrating screen
- On-board electric generating set
- Integrated motors and control box

Mobility & Setup

High chassis, Narrow body design, Highway transportable, Quick setup, Traction axle

Applications

Suitable Applications

Mining • Hydropower • Coal projects • Construction disposal • Road construction • Asphalt concrete
