

Mobile Concrete Mixer

This mobile concrete mixer is designed for on-site mixing of concrete. It features a rotating drum, aggregate hopper, and towing capabilities.

Overview

Mobile Concrete Mixer Solution

This mobile concrete mixer is engineered for efficient on-site concrete production, making it an ideal choice for diverse construction projects. It features a robust rotating drum, an integrated aggregate hopper, and convenient towing capabilities for easy transport. Equipped with a reliable diesel engine and a precise water pump system, it ensures consistent concrete quality and operational reliability in various environments.

Technical Specifications

Model Number	SZM350
Power Source	Diesel Engine

Features

Key Features

- Rotating mixing drum
- Integrated aggregate hopper
- Towing capability for mobility
- Precision water pump system

Application Suitability	On-site mixing, Construction projects, Mobile operations
