

Mobile Concrete Mixer

This mobile concrete mixer is available in several models with gear tipping bucket feeding, gear hopper climbing feeding, or friction wheel drive up the bucket feeding. These mixers feature a simple structure.

Overview

Versatile Mobile Concrete Mixing Solutions

These double cone roller, self-falling concrete mixers are engineered for efficiency and ease of use on construction sites. Available in multiple configurations including gear tipping bucket, hopper climbing, and friction wheel drive systems, these units offer reliable mixing performance. Their robust, mobile design ensures convenient operation and easy transport, making them an essential asset for various construction projects.

Technical Specifications

Available Models

- JZC350
- JZC350B
- JZM350

Feeding Mechanisms

Model	Feeding Method
JZC350	Gear tipping bucket
JZC350B	Gear hopper climbing
JZM350	Friction wheel drive up bucket

Mixer Type	Double cone roller, self-falling
