

Mobile Concrete Mixing Plant

This mobile concrete mixing plant offers a versatile and efficient solution for on-site concrete production. The plant's modular design ensures easy transportation and quick setup, incorporating aggregate hoppers, a weighing system, a mixing unit, and a control system for precise batching.

Product Overview

Mobile Concrete Mixing Plant

The QYHZD/S series is a trailer-style mobile concrete mixing station designed for efficient on-site production. It integrates material collection, accurate weighing, consistent mixing, and rapid transportation into a single, compact unit. Engineered for versatility, this plant is ideal for infrastructure projects including road, bridge, and port construction, as well as water and electricity development.

Design & Mobility

Key Features

- Trailer-style mobile design
- Integrated weighing and mixing system
- Quick transportation and setup
- Simplified operation

Applications

Suitable For

Road Construction, Bridge Construction, Port Construction, Water & Electricity Projects
