

Mobile Cone Crusher Plant for Rock and Ore

This mobile cone crusher plant is a versatile and efficient solution for crushing various types of rock and ore. It is mounted on a mobile chassis, allowing for easy transportation and setup at different job sites.

Product Overview

High-Performance Mobile Crushing Solution

This heavy-duty mobile cone crusher plant is engineered for superior rock and ore processing, featuring a large crushing cavity and wear-resistant materials. Designed for mobility and efficiency, the unit includes self-track walking capabilities and an intelligent wireless remote control system for rapid site deployment and easy transport. Maintenance is streamlined through a hydraulic back frame opening system, ensuring reliable operation in demanding mining and construction environments.

Technical Specifications

Crushing Features

- Large crushing cavity
- High wear-resistant material
- Stable product output
- High capacity
- Excellent material shape

Model Designation

DM-HP385 / DM-JP385

Operational Features

Available Customizations

- Iron remover system
- Return system
- Feeding system

Mobility & Control

Self-track walking, Wireless remote control, Hydraulic maintenance system, Mobile chassis

Maintenance

Yes
