

Mobile Cone Crusher Plant

The mobile cone crusher plant is designed for multistage crushing of large materials. It screens the discharges according to different specifications.

Product Overview

High-Efficiency Mobile Crushing Solution

The mobile cone crusher plant offers a versatile and efficient solution for on-site material processing. This self-contained unit combines a robust cone crusher, vibrating feeder, and vibrating screen on a single mobile chassis for rapid deployment. Designed for high capacity and ease of transport, it serves as an ideal choice for demanding construction, mining, and recycling operations.

Technical Configuration

Core Components

- Cone Crusher
- Vibrating Feeder
- Vibrating Screen
- Mobile Chassis

Power and Control

Power System	Diesel Engine
Control System	Yes

Application Suitability

Suitable Industries	Construction, Mining, Recycling
---------------------	---------------------------------

Operational Features

Operational Highlights

Mobile Chassis • Consistent Material Flow • Compact Design • High Crushing Capacity
