

# Mobile Crushing and Screening Plant

This mobile plant efficiently crushes and screens materials directly on-site. The self-contained unit combines feeding, crushing, and screening for enhanced productivity and reduced transportation costs.

## Product Overview

### Mobile Crushing and Screening Solution

This mobile crushing and screening plant is a self-contained, high-efficiency unit designed for on-site material processing. It integrates feeding, crushing, and screening operations into a single, flexible platform that reduces transportation costs and enhances productivity. Ideal for construction, mining, and recycling applications, the system features a robust crusher unit and a multi-deck screen for precise material classification.

## Technical Capabilities

### Operational Workflow

- Material feeding
- Preliminary crushing
- Closed-loop screening
- Material circulation
- Conveyor transport

### Compatible Crusher Types

Jaw Crusher, Counterattack Crusher, Cone Crusher, Impact Crusher

## Design & Features

### Key Features

Mobile Platform • Adjustable Settings • Durable Construction • Integrated Conveyor System • Safety Mechanisms

### Power Options

- Diesel Engine
- Electric Motor

## Applications

### Suitable Industries

Construction, Mining, Recycling
