Product Overview

Built for Rental Reliability

This high-performance mobile diesel generator is engineered for versatility and resilience in demanding field environments. Designed for rapid deployment, it features a trailer-mounted system that allows for easy transport across construction sites and event venues. Its rugged, weather-resistant enclosure ensures consistent power delivery while minimizing noise output for diverse applications.

Technical Specifications

Rated Power Capacity

30 KW

Rated Power

Electrical Configuration

Three-Phase

Design and Portability

Stabilization Equipment

- Adjustable support legs
- Leveling jacks
- High structural resistance frame

Transportation

Towable Trailer, Single-Axle, Mobile

Operational Features

Environmental Protection

Weather-resistant enclosure • Noise reduction • Tough environmental ready
