Product Overview

Mobile Power Solution

This mobile diesel generator set is engineered for versatility and reliability in demanding field conditions. Mounted on a robust, towable trailer, it provides a convenient power solution that can be easily transported to construction sites or remote locations. The unit features a soundproof, weather-resistant enclosure with advanced shock absorption, ensuring consistent performance and protection against dust and rain.

Design & Mobility

Mobility Features

- Trailer-mounted design for easy towing
- High-strength structural frame
- Integrated shock absorption for road transport
- Weather-resistant (rain and dust proof) enclosure
- Optimized ventilation system for cooling

Transport Compliance

Towable, Road-transport ready, Soundproof
