

Mobile Diesel Generator Unit

This mobile generator unit provides electrical power in remote locations and functions as a backup power source. The generator is mounted on a wheeled trailer for easy transportation and housed in a soundproof enclosure to minimize noise.

Overview

Industrial Mobile Power Solution

This mobile diesel generator unit is engineered for reliable power generation in demanding environments, including remote job sites and industrial facilities. Designed for portability, the unit is mounted on a robust wheeled trailer system, allowing for rapid deployment and easy transport between locations. The generator features a specialized soundproof enclosure, ensuring quiet operation suitable for noise-sensitive areas while maintaining heavy-duty performance.

Design & Mobility

Primary Application

Industrial • Commercial • Backup Power

Mobility Features

Wheeled Trailer, Portable, Soundproof Enclosure
