

Mobile Diesel Generator with Solar Assist

This self-contained diesel generator unit provides electrical power for diverse applications. It features a durable enclosure with maintenance access, ventilation, and portability wheels, enhanced by solar panels for supplemental power.

Product Overview

Mobile Power Solution

This self-contained diesel generator is engineered for reliable power generation in diverse environments, from remote job sites to emergency backup scenarios. Featuring a robust, weather-resistant enclosure, the unit is fully mobile and mounted on wheels for easy relocation. Integrated solar panels on the top provide supplemental power, enhancing efficiency and battery maintenance capabilities.

Technical Specifications

Suitability

Outdoor Use • Backup Power • Remote Locations

Power Source	Diesel, Solar Assist
Mobility	Yes

Design Features

Enclosure	Robust protective housing with maintenance access doors
Cooling & Ventilation	Integrated ventilation system for cooling and exhaust
