

Mobile Digital Video Recorder for Vehicle Surveillance

This slim mobile digital video recorder offers high integration and protection for vehicle surveillance. It utilizes H.264 video compression, network connectivity, and GPS/BDS positioning technology.

Overview

Ruggedized Mobile Surveillance Solution

This compact and durable Mobile Digital Video Recorder (MDVR) is engineered specifically for demanding vehicle surveillance applications. Designed to withstand harsh operating environments, it ensures reliable real-time video recording, storage, and transmission. With robust connectivity options and seamless integration capabilities, this device serves as a critical component for comprehensive mobile monitoring systems.

Key Features

Core Capabilities

- Real-time video recording
- Advanced data storage
- Remote transmission support
- Ruggedized enclosure design
- Multiple video input channels

Model Identifier

CM-1SA1

Technical Specifications

Performance Metrics

1 Ruggedized
