

Mobile DVR Emergency Panic Button with LED Status Indicators

This LED panel features a panic button for signaling emergencies and displaying the working status of Mobile DVRs. The LED indicators show power, error, event, memory, VLoss, recording, GPS, and communication status.

Overview

Emergency Status and Control Interface

This specialized LED panel and panic button serves as a critical interface for mobile digital video recording systems. It provides drivers and operators with immediate visual feedback regarding system health, recording status, and connectivity. The integrated emergency button allows for rapid event triggering, ensuring that critical incidents are captured and flagged for timely response.
