

Mobile Electric Scissor Lift Platform

The mobile electric scissor lift is a versatile platform for safely elevating workers and materials. Its compact design allows easy maneuverability in tight spaces, while the robust scissor mechanism ensures stable vertical movement.

Overview

Versatile Aerial Work Platform

This Mobile Electric Scissor Lift is a self-propelled aerial work platform designed for efficient operation in both indoor and outdoor environments on flat surfaces. Its compact footprint and non-marking tires make it ideal for maintenance, installation, and construction tasks in tight spaces. Powered by rechargeable batteries, the unit offers a quiet, emission-free, and stable solution for accessing elevated work areas.

Key Performance Metrics

240 kg

Lifting Capacity

2 people

Max Load Occupancy

12 V

Power Source Voltage

Technical Specifications

Model Comparison

Specification	XEM50MINI	XEM60MINI
Working Height (Max)	5m	6m
Platform Height (Max)	3m	4m
Weight	480 kg	565 kg
Stowed Height	1.85m	1.94m
Raised/Lowering Time	28/24s	35/18s

Common Dimensions

- Platform Size: 1.15m x 0.76m x 1.1m
- Stowed Size: 1.15m x 0.76m
- Wheelbase: 1.07m
- Ground Clearance: 0.06m
- Skirting Board Height: 0.15m

Safety & Operation

Operational Tilt Limits

- Vertical Tilt: 2°
- Lateral Tilt: 1°

Safety Features

Emergency Stop Button, Tilt Sensors, Descent Alarms, Non-marking Tires, Battery Charge Indicator
