

Mobile Firewood Circular Saw

This mobile firewood circular saw is designed for cutting logs into firewood. It features a robust steel frame, blade protection, and wheels for easy transport.

Product Overview

Mobile Firewood Circular Saw

This mobile firewood circular saw is engineered for efficiency and safety in processing logs into firewood. Built with a robust steel frame, it ensures long-term durability in demanding environments. The unit features an ergonomic log feeding system and an enclosed blade design, prioritizing operator protection while maintaining high productivity. Equipped with wheels, this saw offers excellent portability for easy repositioning around the workspace.

Technical Specifications

Power Source	Electric Motor
Frame Material	Steel

Key Features

Primary Use	Firewood Processing • Log Cutting
Safety Features	Safety Guard, Enclosed Blade, Ergonomic Feeding
Mobility	Yes
