

Mobile Generator Trailer with Adjustable Tow Rack

This mobile generator trailer is equipped with armor plate spring structure. The adjustable-height bolted towed rack makes it suitable for different trailer heights, and it has mechanical underprops at each corner.

Overview

Versatile Mobile Power Solution

This trailer-mounted generator base is engineered for high-mobility power requirements in construction, emergency, and event settings. It features an adjustable-height bolted towing rack to ensure compatibility with a wide range of tractor vehicles. The robust design includes mechanical underprops at all corners to maintain stability during operation.
