Overview

Mobile Seed and Grain Grading Solution

This mobile grain grading machine is engineered for high-efficiency sorting and processing of agricultural seeds and grains. Designed with portability in mind, the unit features a robust chassis that allows for easy transport between different operational sites. With multi-stage screening capabilities and adjustable settings, it provides precise separation based on size and density, ensuring optimal seed quality and planting efficiency.

Technical Specifications

Model Specifications

Model	Layers	Sieve Area (mm)	Power (Kw)	Capacity (Kg/h)	Weight (Kg)
5XFJ-5B	3	1000x2000	7.74	5000	1000
5XFJ-5C	4	1000x2000	7.74	5000	1050
5XFJ-7.5B	3	1250x2400	8.5	7500	1200

Design & Features

Key Features

- Mobile trailer chassis for easy transport
- Multi-stage screening system
- Adjustable support legs for stability
- Pneumatic tires for smooth towing
- Multiple grading outlets for precise separation

Primary Applications

Seed Cleaning, Grain Processing, Agricultural Sorting
