

Mobile Helical Antenna for Vehicle Communication

This mobile antenna features a helical coil design, enhancing signal reception. Constructed for durability, it has a chrome and black finish suitable for vehicle mounting, ensuring reliable communication.

Product Overview

High-Performance Mobile Communication

The Mobile Helical Antenna for Vehicle Communication is engineered for robust and reliable signal reception in diverse operational environments. Featuring a specialized helical coil design, this antenna ensures consistent connectivity for critical communication needs. Its durable construction, finished in a professional chrome and black aesthetic, makes it a resilient choice for various vehicle mounting applications.

Technical Specifications

Model Number	J8A-308-A
Design Type	Helical Coil
Finish	Chrome, Black
Application	Vehicle Mounting
