Overview

Mobile Hose Reel Traveler Irrigator

The 560GX series mobile hose reel irrigator is a robust and efficient irrigation solution designed for large-scale agricultural and landscaping applications. This automated system features a high-capacity hose reel mounted on a wheeled chassis, allowing for easy transport and maneuverability across fields. Engineered for performance, the system delivers uniform water coverage through adjustable sprinkler settings, optimizing efficiency and minimizing water waste in demanding environments.

Performance Data

Model Specifications Comparison

Model (Dia/Len)	Eff. Length (m)	Flow Rate (m3/h)	Nozzle Dia (mm)
63/300	340	10-21	12-16
70/330	330	12-26	14-18
75/250	250	14-34	14-20
75/300	300	14-34	14-20

Inlet Pressure

0.55 MPa

Weight and Handling

Weight Specifications

1740 kg

Max Weight (With Water)

1120 kg

Min Weight (Empty)

Key Features

System Highlights

Automated Irrigation, Mobile Wheeled Chassis, Uniform Water Distribution, Adjustable Sprinkler Settings, High-Capacity Hose Reel
