

Mobile Hydraulic Light Tower, 4 x 1000W Metal Halide Lamps

This mobile lighting tower provides powerful illumination for construction, emergency, and industrial applications. The metal-halide lamps provide light coverage for large areas.

Overview

High-Intensity Mobile Illumination

The Mobile Hydraulic Light Tower is engineered for demanding environments such as construction sites, emergency response operations, and large-scale outdoor events. Featuring a robust hydraulic mast, this unit allows for rapid, safe deployment of its four 1000W metal halide lamps. With an integrated generator for autonomous operation and a durable, portable trailer design, it provides reliable, high-luminous efficacy lighting wherever it is needed most.

Technical Specifications

Lighting System

4 units

Number of Lamps

1000 W

Lamp Power

Model Identifier

GPL-4000H

Lamp Type

Metal Halide

Features & Safety

Operational Capabilities

- Integrated Generator for autonomous power
- Durable trailer for portability
- High luminous efficacy
- Long lamp lifespan

Deployment Mechanism

Hydraulic Mast

Safety Features

Automatic Shut-off, Secure Locking System, Stable Base
