Overview

Industrial Hydraulic Lifting Solution

This mobile hydraulic scissor lift table is engineered for efficient lifting and transporting of heavy loads in demanding industrial environments. Featuring a robust steel frame and smooth-rolling casters, it offers reliable performance for warehouses and factories. The integrated hydraulic mechanism, operated via a convenient foot pedal, allows for precise and easy height adjustment to suit various operational needs.

Technical Specifications

Available Models

- SP150
- SP300
- SP500

Design Features

Hydraulic Mechanism, Scissor Lift, Mobile, Steel Frame

Certifications & Safety

Safety Standards

CE • TUV Rheinland • Product Safety
