

Mobile Industrial Air Compressor

This mobile air compressor is designed for industrial use. It features an enclosed design with ventilation and is mounted on a wheeled chassis with a tow bar.

Overview

Mobile Industrial Air Compressor

This mobile industrial air compressor is engineered for high-performance tasks requiring reliable, large-volume air delivery. Featuring an intelligent, robust design with efficient ventilation for cooling, it ensures strong stability during prolonged operation. The unit is mounted on a heavy-duty wheeled chassis with an integrated tow bar, making it an ideal, easy-to-use solution for diverse industrial applications.

Performance

Air Delivery

100 m³/min

Gas Volume

Design & Mobility

Mobility Features	Wheeled Chassis, Tow Bar, Mobile Unit, Enclosed Design
Maintenance Access	Yes

Key Features

Key Advantages

- Easy to use interface
- Large gas volume capacity
- Intelligent design architecture
- Strong operational stability
- Wide range of industrial applications
