

Mobile Industrial Mixing Tank

This mobile industrial mixing tank is designed for batch processing or continuous mixing of materials. The unit features a cylindrical tank with a conical bottom, supported by a frame on wheels for mobility.

Product Overview

Mobile Industrial Mixing Tank

This industrial mixing tank is engineered for efficient batch processing and material handling in demanding environments. Designed with mobility in mind, the unit features a robust frame mounted on wheels, allowing for flexible positioning within your facility. It utilizes a dual-motor system with belt-driven mechanisms to ensure consistent mixing and processing performance.

Technical Specifications

Drive System

- Top-mounted mixing motor
- Belt-driven transmission
- Base-mounted auxiliary motor

Power Source

Electric

Mobility & Design

Mobile Chassis, Wheel-mounted, Conical Bottom Tank
