

Mobile Irrigation Pump Unit with Sprinkler System

This mobile irrigation pump unit is designed for efficient water distribution in agricultural settings. The self-contained system features a robust engine, a high-performance water pump, and a mobile chassis for easy transportation.

Overview

Mobile Irrigation Solution

This mobile irrigation pump unit is engineered for efficient water distribution in diverse agricultural settings. Featuring a robust engine paired with a high-performance water pump, the system is mounted on a mobile chassis for easy transportation. The inclusion of a tripod-mounted sprinkler system allows for flexible, adjustable water coverage, making it an ideal self-contained solution for irrigation needs in remote or dispersed areas.

Key Features

Mobility & Design

- Wheeled cart chassis
- Manual maneuverability handles
- Self-contained system design
- Tripod-mounted sprinkler

Technical Specifications

Best For

Agricultural Irrigation • Remote Areas • Dispersed Fields

System Components

Robust Engine, High-Performance Pump, Mobile Chassis, Tripod Sprinkler
