Overview

Mobile Crushing Solution

This portable jaw crusher plant is engineered to expand the operational capabilities of coarse and fine crushing tasks. Designed for versatility, the unit integrates a high-performance jaw crusher, feeder, belt conveyor, and vibrating screen into a single, mobile chassis. It provides a flexible, efficient, and cost-effective solution for on-site material processing in construction, mining, and recycling applications.

Key Features

Integrated Components

- High performance jaw crusher
- Vibrating feeder
- Belt conveyor
- Vibrating screen
- Vehicle electric generating set
- Control box and motors

Advantages

Integrative equipment group, High flexibility, Lower freight cost, Efficient operation, Easy maintenance, Reliable performance

Technical Specifications

Mobility & Setup

Feature	Description
Traction	Turn axle of traction for road transit
Installation	Vehicle installation supporting for quick stationing
Design	Mobile chassis for easy relocation

Warranty

2 Year Warranty
