

Mobile Jaw Crusher Plant

This mobile crusher plant is developed with a novel design for stone crushing. Its ship form structure lowers the chassis for convenient mobility.

Overview

High-Efficiency Mobile Crushing Solution

This mobile jaw crusher plant is engineered for versatile and efficient crushing operations across various job sites. Mounted on a robust mobile chassis, the system integrates a feeding hopper, vibrating feeder, high-performance jaw crusher, and a discharge conveyor into a single, transportable unit. It is specifically designed to handle materials such as rock, ore, and concrete, ensuring reliable performance and high capacity for demanding construction and mining projects.

Technical Specifications

Equipment Type

Mobile Crushing Station • Jaw Crusher

Model Identifier

YG938E69

System Components

Included Components

- Feeding Hopper
- Vibrating Feeder
- Jaw Crusher
- Discharge Conveyor
- Control Panel
- Mobile Chassis

Applications

Suitable Materials

Rock, Ore, Concrete
