

Mobile LED Light Tower

This mobile light tower provides powerful illumination for various applications. It features a hydraulic-controlled mast for easy positioning and optimal lighting.

Overview

High-Efficiency Mobile Lighting Solution

This 6000W LED light tower is a portable solution engineered for demanding environments such as construction sites, emergency response, and outdoor events. It features a hydraulic-controlled mast that allows for precise raising and rotation to ensure optimal illumination coverage. Mounted on a robust trailer with integrated outriggers, the unit provides exceptional stability and ease of deployment across various terrains.

Performance

Total Power

6000 W

Power Output

Lighting Technology

High-Intensity LED • Energy-Efficient • Bright Illumination

Mast System

Mast Control System

- Hydraulic-controlled raising
- Hydraulic-controlled rotating
- Easy positioning for optimal light spread

Mobility & Stability

Deployment Features

Trailer-Mounted, Outriggers, Portable, All-terrain Stability

Operation

Operation and Maintenance

- Easy operation interface
- Low maintenance design
- Cost-effective lighting solution
- Durable construction for demanding environments

Applications

Recommended Applications

Construction Sites, Emergency Response, Outdoor Events, Industrial Sites
