

Mobile LED Light Tower

This mobile lighting solution is designed for construction sites, emergency response, and outdoor events. It features a telescoping mast for wide-area illumination and a wheeled chassis for easy transport.

Product Overview

Mobile LED Light Tower

This mobile LED light tower is designed as an economic and highly portable solution for nighttime construction, asphalt paving, and emergency response. Featuring a self-locking mast for enhanced safety and a wheeled chassis with a footbrake, it offers both ease of operation and maneuverability. It is a versatile lighting system suitable for various demanding environments, including disaster relief, mining, tunnel maintenance, and large-scale outdoor events.

Key Features

Key Features

- Small and convenient design
- Easy-operating controls
- Economic operational type
- Easy-moving chassis with footbrake
- Self-locking mast for safety
- Multi-directional flood illumination

Applications

Applications

Construction, Asphalt Paving, Disaster Relief, Water Supply Maintenance, Tunnel Maintenance, Mining, Waste Disposal, Parking Lots, Airports, Combat Readiness

Technical Specifications

Lighting Power

4000 W

Total Power

Power Source

Integrated Generator
