Product Overview

High-Performance Mobile Lighting Solution

This mobile LED lighting tower is engineered for demanding environments such as construction sites, emergency response operations, and large-scale outdoor events. Powered by a high-capacity lithium battery, it delivers reliable, emission-free, and silent illumination for extended periods. The unit features a telescopic mast for adjustable height and a robust, wheeled chassis that ensures easy transport and rapid deployment in remote locations.

Technical Specifications

Power Source	Lithium Battery
Lighting Technology	LED
Mast Configuration	Telescopic

Features

Key Features

- Silent, emission-free operation
- Adjustable LED floodlights
- Integrated control panel for dimming and timer
- Battery status monitoring
- Auxiliary power outlets
- Portable wheeled chassis

Applications

Suitable Applications	Construction Sites, Emergency Response, Outdoor Events, Remote Locations
