

Mobile Light Tower with Balloon Light

This mobile light tower provides a wide lighting area. The parallel lamp structure offers efficient illumination, directing light effectively to the work site.

Overview

High-Efficiency Mobile Illumination

This mobile light tower features an advanced balloon light design that provides superior 360-degree coverage for construction sites, emergency response, and outdoor events. Engineered for mobility, the unit includes automotive-grade wheels and a robust telescopic mast for rapid deployment. Beyond its primary lighting function, the integrated generator serves as a versatile power source, allowing users to switch between lighting and auxiliary electrical loads.

Performance & Lighting

Lighting Efficiency	Parallel lamp structure delivers up to 50% more light output compared to standard systems.
Light Distribution	Unique shade design redirects 10% of light downward to the work site, reducing skyward light waste.
Lamp Technology	Metal Halide, Filament-free

Power & Electrical

Supported Voltages

- 110V
- 120V
- 230V
- 240V

Dual Application Capability	Yes
-----------------------------	-----

Mobility & Transport

Transport Features

- Automotive-quality wheels
- Road-ready tires
- Connecting hitch
- Steel towing cable
