

# Mobile Lighting Tower for Construction

This mobile lighting tower is designed for construction sites and areas requiring temporary, high-intensity illumination. It features a telescoping mast with adjustable floodlights and a wheeled base for easy maneuverability.

## Overview

### High-Performance Mobile Illumination

This mobile lighting tower is engineered for demanding construction sites and areas requiring robust, temporary illumination. Featuring a telescoping mast with multiple adjustable floodlights, it delivers wide-area coverage to enhance safety and visibility. The unit is fully self-contained, mounted on a wheeled base for superior maneuverability, and powered by an integrated generator.

## Key Features

Primary Applications	Construction Sites, Emergency Response, Outdoor Events, Nighttime Operations
Mobility	Wheeled base for easy transport

## Technical Details

Power Source	Integrated Generator
Mast Configuration	Telescoping
Lighting Setup	Multiple adjustable floodlights
