

# Mobile Lighting Tower for Construction

This mobile lighting tower provides powerful illumination for construction sites and emergency situations. Its robust generator ensures reliable power, and the wheeled chassis allows for easy positioning.

## Overview

### High-Intensity Mobile Illumination

This mobile lighting tower is engineered to provide powerful, reliable illumination for demanding environments such as active construction sites, roadwork projects, and emergency response scenarios. Featuring four high-intensity lamps, it delivers extensive area coverage to ensure safety and productivity during night operations. The unit is mounted on a durable wheeled chassis, allowing for effortless maneuverability and precise positioning even in remote locations.

## Technical Specifications

Number of Lamps	4
Power Source	Integrated Generator
Mobility Features	Wheeled Chassis, Portable, Easy Maneuverability

## Applications

### Suitable Environments

- Construction Sites
- Roadwork
- Emergency Situations
- Remote Locations

## Performance Metrics

### Operational Capability

**4 units**

High-Intensity Lamps
